

Caribbean Data Analysis: Help create project statistics and easy-to-read achievement brochures

Project Title	Caribbean Data Analysis: Help create project statistics and easy-to-read achievement brochures
Project Summary	Help! PR Food Bank has run successful anti-hunger programs for over 10 years; no statistics have been developed with our program results. When results are created, we will need easy-to-read achievement brochures that will entice potential donors and grant makers to help us mitigate hunger in PR.
Country	United States

Project Description

The Food Bank of Puerto Rico needs to use available historical information to create correct and transparent program statistics by program cycle. This information is necessary in order to show our success in numbers to our current and potential donors as well as grant makers. Easy-to-read success brochures will make this information readily available.

Required Skills or Interests

Skill(s)

Data analysis

Data visualization

Design thinking

Graphic design

Research

Additional Information

Please note that variables exist between the historical information we have archived from year-to-year. We need

to compare “apples-to-apples” in order to show our success rate. We are looking for a student with a background in statistics, economics, and similar to:

- 1. Create program statistics with available information
- 2. Create easy-to-read brochures with eye catching graphs
- 3. Help write new forms/questionnaires for program participants to complete; making sure correct questions are being asked to ensure we gather the information we need.
